Note: Gravestones are listed in alphabetical order by surname and then by the first name inscribed (ignoring initials where the middle name was preferred for common use).

A few memorial notations (i.e. "Ever Remembered", etc) have been excluded in certain cases due to difficulty reading them (illegibility, partially buried or obscured, etc). Such omissions are not noted here. In no case was any vital information (names, dates) knowingly excluded from the transcriptions.

Individual lines of text, including each arm of metal crosses, are separated by a single slash "/." Individual columns of information are denoted by a double slash "//." Where information appears on multiple sides of a single stone, each side is listed as (Front), (Back), etc.

Dates that are blank on the gravestones are denoted by "___."

Disclaimer: Every attempt has been made to ensure the accuracy of both the original hand-written transcriptions as well as this digital copy. However, errors are possible. Please compare to the original gravestones when possible.
